

Control Procedural Pain Fast

Gebauer's Pain Ease® topical anesthetic skin refrigerant works in seconds to temporarily reduce the pain associated with needle and minor surgical procedures.

FDA Approved Indications: Gebauer's Pain Ease and L.M.X.4®

What is Pain Ease Approved for?

Temporarily reduces the pain associated with:

- IV starts
- Blood draws
- Injection
- Incision and drainage of small abscesses
- Suturing
- Suture removal
- Foreign body removal

What is L.M.X.4® Approved For?

Temporarily relieves pain and itching due to:

- Minor cuts
- Minor scrapes
- Minor burns
- Sunburn
- Minor skin irritations
- Insect bites

L.M.X.4® is a registered trademark of Ferndale IP, Inc.

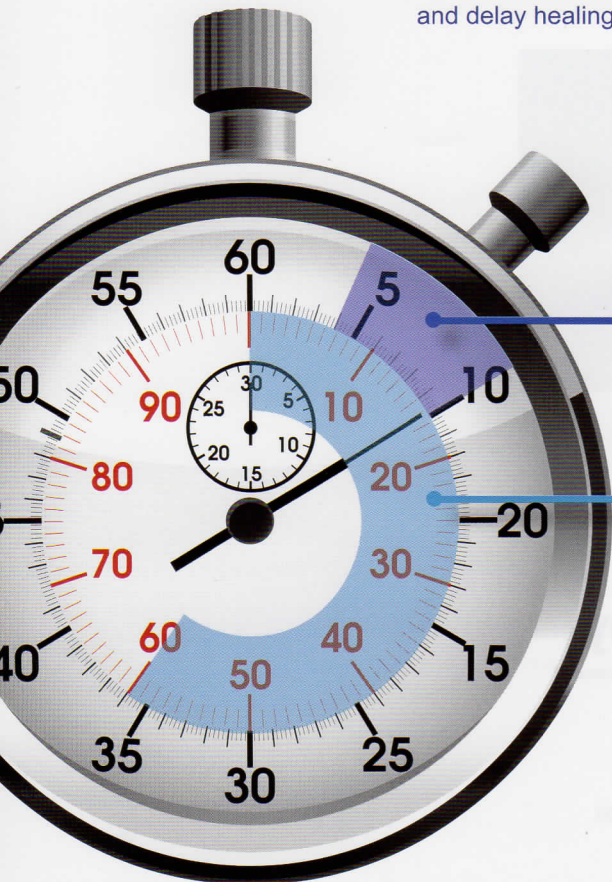

Use a topical anesthetic that is cleared to temporarily control the pain associated with needle and minor surgical procedures. Gebauer's Pain Ease is also the only instant topical anesthetic skin refrigerant cleared for use on intact skin, minor open wounds and intact oral mucous membranes. Pain Ease can be used without a physician's order. Non-drug and non-flammable, Pain Ease can be reapplied as needed with no systemic toxicity or risk of methemoglobinemia.

Important Risk and Safety Information for Gebauer's Pain Ease:

Published clinical trial results support the use in children three years of age and older. Do not use on large areas of damaged skin, puncture wounds, animal bites or serious wounds. Do not spray in eyes. Over spraying may cause frostbite. Freezing may alter skin pigmentation. Use caution when using product on diabetics or persons with poor circulation.

Apply only to intact oral mucous membranes. Do not use on genital mucous membranes.

The thawing process may be painful and freezing may lower resistance to infection and delay healing. If skin irritation develops, discontinue use. Rx only.

Gebauer's Pain Ease works in 4-10 seconds and lasts up to 60 seconds.

Published clinical trial data states that commercially available topical anesthetic creams take 30-60 minutes to work depending on the indication.
